SAM4S

A Compact, Practical, and Inexpensive POS Workstation

Shown with optional scanner, printer, keyboard expansion and MSR.

- Small, Space Saving, All-in-One Keyboard and Display Module
- Easy to Read and Adjustable Multi-Line Backlit Operator Screen
- 4 RS232C and Standard IRC Ports Allow Numerous Point-of-Sale Options
- Built-In Software With Memory For Demanding Applications
- A Distributed POS Solution That Grows With Your Business

ER-600 SERIES

The low profile ER-600 is an economically priced, high performance point-of-sale workstation. The entire module is roughly the same size as an average PC keyboard – relieving valuable space needed in any business environment. The bright, adjustable, multi-line operating screen cuts training time, increases customer throughput, and reduces errors. The flexible ER-600 is the perfect solution for food service concessions and quick service kiosks. It's ideal for any small retail establishment, such as liquor, tobacco, coffee and small grocery stores.

Your ER-600 system can be configured with a variety of hardware options, including your choice of: requisition receipt, slip, and/or kitchen printers, scanners, customer display, coin dispensers, and scales. A second 49-key module can be added to the standard 49-key keyboard.

Operator Screen

Just glance at the screen to verify or fill an order. If necessary, you can page up or down through larger transactions. Easy-to-follow messages guide operators with minimal training.

Multiple Ports Standard
